Measuring progress in Incremental Development project lifecycle

Project Title	Measuring progress in Incremental Development project lifecycle
Project Summary	Think out of the box and come up with criteria for measuring earned value/progress in incremental development lifecycle.
Country	United States

Project Description

Federal Government encourages utilizing the incremental development/iterative approach in IT investments to realize values in increments and reduce investment risks. Most of HHS's IT projects currently utilize incremental development with a project lifecycle of 6 months or less. We are interested in coming up with a set of criteria to measure status/health of a project at any point of time.

Required Skills or Interests

Skill(s)
Analytical writing
Data analysis
Research

Additional Information

We are looking for someone with knowledge of IT project lifecycle, iterative development and project status tracking.
